EOS EVENT SOLUTIONS by Creative Technology is an all-in-one breakout room solution built and tested by our innovative engineers. We saw a need to create a rack that could be wheeled into a room and offer a complete AV solution. With built in Audio, Video, Lighting & support technology, we're able to easily setup a breakout room in record time. Saving you money in both equipment and staff.

Audio:

- 12x Mic/Line Inputs
- 8x Line Level Outputs
- Space for 8x Channels of wireless racked inside (a la carte)
- Parametric EQ, Feedback Suppression, Auto-mixing, Compressors, etc.
- Future Dante capabilities allowing for additional routing and console integration
- Built-in audio playback
- Record monitoring and PFL capabilities

Lighting:

- Front Light, Up Light and Back Light control
- 4x static scenes: 3x programmable, 1x blackout
- Pre-configured fixture profiles supporting conventional dimmers and RGBAW LED Fixtures

Video:

- 10x Inputs (up to 4K@30)
- 3x HDMI
- 2x SDI
- 4x DTP/HDBaseT (HDMI to DTP Transmitter boxes included)
- 1x 4X bang-box switcher (transmits over DTP or HDMI)
- 1x Display Port
- 3x HDMI
- Built-in video playback
- 4x Scale-able Outputs (up to 4K@30)
- 2x HDMI/DTP/HDBaseT (DTP to HDMI Receive boxes included)
- 2x DTP/HDBaseT (DTP to HDMI Receive boxes included)
- Built-in windowing processor with network stream and internal and USB record options for PIP-ed camera & program feeds

Support:

- Presenter touch-panel with Speaker-Timer options in addition to optional programable presets to control most everything in the rack.
- Speaker-Timer overlay in DSM or standalone monitor
- Ethernet looms allow for flexibility of rack location on-site
- When connected via a hard-line to the Internet, pre-scripted text-messages and emails can be triggered via a "Help" button
- Everything is controlled via Crestron through a Microsoft Surface tablet and custom interface with user- friendly pages for easy control and advanced handles for experienced users
